Using Facebook to Connect with Students

1

Set up Facebook

- Get a Facebook account at **http://www.facebook.com**

- Add the developer application to your account at **http://developers.facebook.com/get_started.php**
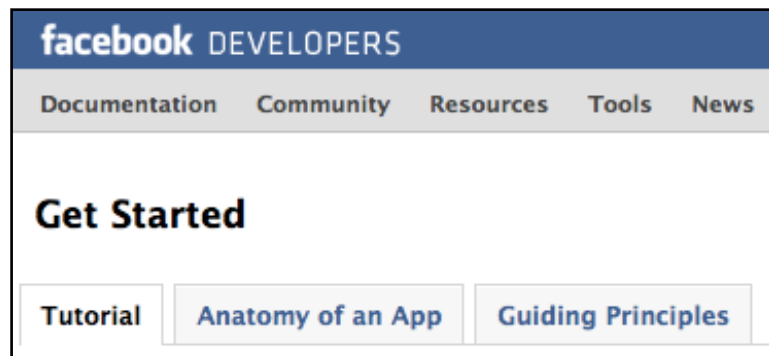

2

Read documentation

- Documentation is available at **http://wiki.developers.facebook.com/**
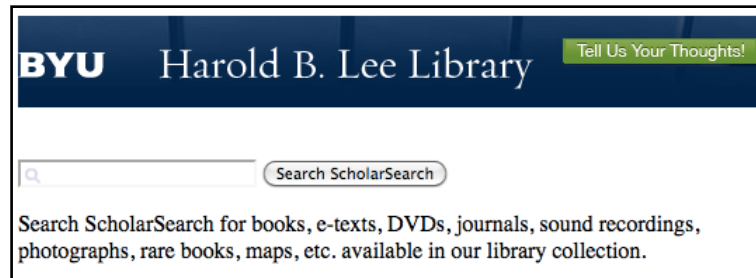

3

Download library

- The following platform client libraries are available:
  - PHP
  - JavaScript
  - Connect for iPhone
  - Flash/ActionScript
  - ASP.NET
  - ASP (VBScript)
  - Cocoa
  - Coldfusion
  - C + +
  - C#
  - D
  - Emacs Lisp
  - Erlang
  - Google Web Toolkit
  - Java
  - Lisp
  - Perl
  - Python
  - Ruby on Rails
  - Smalltalk
  - VB.NET

4

Build & test app

- Applications must be built, tested and hosted on your own server

5

Integrate into Facebook

- Facebook allows you to integrate applications into many different areas of Facebook including:
  - Users' profiles
  - Users' boxes
  - Users' tabs
  - Inviting users' friends to add application
